PROJECTS

- **Wanderlust**
Developed a full-stack Airbnb clone using HTML, CSS, Bootstrap, JavaScript, Node.js, Express, MongoDB, and EJS. Implemented MVC architecture for scalability and clean code. Features include user authentication, property listings, booking system, reviews, and deployment.
- **Weather App**
Created a simple weather application using React.js and Material-UI. Users can input a city name and click search to retrieve current weather details for that location. Utilized Material-UI components for a modern and responsive user interface. This project demonstrates proficiency in React.js and API integration, providing users with real-time weather information in a user-friendly manner.
- **Zerodha Clone**
Developed a fully functional clone of the Zerodha trading platform using the MERN stack. Implemented features such as user authentication, real-time stock data visualization, portfolio management, and order placement. Ensured a seamless and responsive user experience with dynamic UI/UX design principles. Integrated RESTful APIs for fetching live market data and used MongoDB for efficient data storage and retrieval.

CERTIFICATES AND ACHIEVEMENTS
